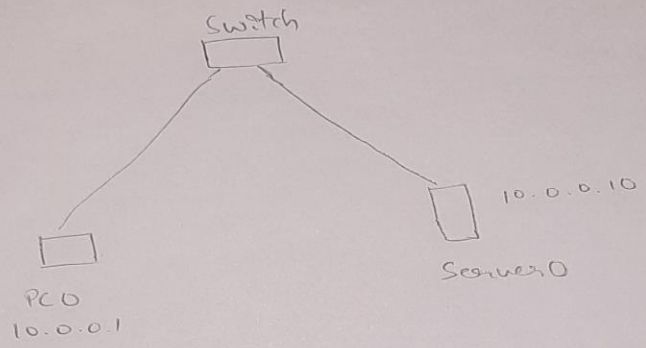
Question: Demonstrate DNS, and web browsing.

Aim: To be able to map using DNS, & access webpage data in the server

Topology:



Procedure:

1. Connect the PC, server, & Switch as shown
2. set ip address from server & PC
3. In the Desktop menu of PC, open browser and search "10.0.0.10" & access server.
4. In the service menu of server,
   - L> Set DNS name, &
   - L> Add/edit web pages.
5. Now after DNS naming set DNS in setting of both PC & server.
6. Now we can access the server using the name

~~GUI commands:~~

Observation:

1] We can Add/edit web pages in the server

2) DNS naming is essential and helpfull.

Dharkat
